

YOU DREAM

WE DELIVER

• Rock features

• Theme facades

• Theme structures

• Sculptures

Since 1957, COST of Wisconsin, Inc. has pioneered building the most imaginative and entertaining theme environments in the world. Our talented multi-disciplinary staff has constructed theme-park projects for Universal Studios, Busch Gardens, SeaWorld, Six Flags and many more.

Our ability to create theme experiences for park patrons is second to none. However, creativity is only half of the theme construction equation; developing these themes within the respective budget is the second half. COST's thorough understanding of custom-designed theme construction allows us to produce scenes, sets, facades and sculptures in the most efficient and cost-effective manner by using a variety of materials such as concrete, fiberglass, GFRC, urethane, wood, metals and acrylic.

An active member of IAAPA (International Association of Amusement Parks & Attractions) since 1982, and the TEA (Themed Entertainment Association) since 1994, COST has been recognized and received awards for many of the fascinating projects we have developed over the years.

FROM CONCEPT TO COMPLETION...

PROJECT DESIGNERS

COST project designers use the latest in AutoCAD software to produce shop drawings and details for the projects we undertake. We work closely with architects, theme park designers, landscape professionals, contractors and owners to deliver the design intent. We create interesting, immersive themes by imaginatively blending rockwork, water features, theme facades, scenery and faux trees to deliver a unparalleled customer experience.

CONSULTATION & MODELS

Our staff members can offer consultation services for any theme construction project. We can advise on material usage and methodology for simulated rock, waterfalls, theme facades, scenery, artificial trees and sculptural elements. During the pre-construction phase for most of our projects, we build a highly detailed three-dimensional model to use for review and approval prior to beginning the fabrication and construction phases.

FABRICATION

Unlike many theme construction firms, COST has the capacity to prefabricate critical theme components within our 140,000-square-foot plant. We utilize shotcrete, GFRC, FRP, epoxies, wood, urethanes, acrylic and other materials to replicate a variety of scenes and sets. The fabrication plant also includes three steel shops for erecting steel armatures, which expedites projects and saves money when timelines are constrained. Smaller thematic elements and sculptures can be manufactured completely within our plant and shipped to the facility for immediate installation.

CONSTRUCTION

Theme construction requires knowledgeable personnel to complete projects on time and within budget. Our artisans, skilled in constructing environments of all kinds, bring to life the ideas developed through design and modeling. We promote a safe work environment and employ a full-time safety engineer to ensure compliance with COST's OSHA Safety Program and to monitor our HAZCOM and environmental guidelines. As an industry-leading theme contractor, our experience ensures clients a smooth transition from concept to completion.
