

YOU DREAM

WE DELIVER

Since 1957, COST of Wisconsin, Inc. has pioneered building the most imaginative and entertaining theme environments in the world. COST's multi-disciplinary staff has constructed theme-park projects for Disney, Universal Studios, Busch Gardens, SeaWorld, Six Flags and many more.

Our ability to create theme experiences for park patrons is second to none. However, creativity is only half of the theme construction equation; developing these themes within the respective budget and schedule is equally important. COST's thorough understanding of custom-designed theme construction allows us to produce scenes, sets, facades and sculptures in the most efficient and cost-effective manner by using a variety of materials such as concrete, fiberglass, GFRC, urethane, wood, metals and acrylic.

As an active member of IAAPA (International Association of Amusement Parks & Attractions) since 1982, and the TEA (Themed Entertainment Association) since 1994, COST has been recognized and received awards for many of the fascinating projects we have developed over the years. Whatever you dream, whether it involves renovating a theme scene, or developing a new theme land, COST delivers.

FROM CONSULTATION TO COMPLETION...

CONSULTATION & MODELS

COST staff members can function as theme construction consultants. We can advise on material usage and constructability for simulated rock, waterfalls, scenery, sets, theme facades, artificial trees, and sculptures. During the pre-construction phase for most of our projects, we build a highly detailed three-dimensional model to use for review and approval prior to beginning the fabrication and construction phases.

SHOP DRAWINGS

Our designers develop shop drawings with the latest in AutoCAD, Revit, and other software to fully integrate details with the design work produced by theme park designers, landscape architects, architects, contractors, owners, and other consultants. Our Computer Aided Framework System (CAFS) enables us to use 3D scanning and create output directly to our automated equipment for fabricating theme elements with incredible detail. This data can be shared with the design and architectural team for Building Information Modeling (BIM) integration and clash detection. We can also recommend "green" methodologies within our projects.

FABRICATION

Unlike many theme construction firms, COST has the capacity to prefabricate critical components within our 140,000 sq. ft. plant. We utilize shotcrete, GFRC, FRP, epoxies, urethanes, acrylic, wood and other materials to replicate the environments we build. The fabrication plant also includes three steel shops for erecting steel armatures, which expedites projects and saves money when timelines are constrained. Small scenes and sculptures can be manufactured completely within our plant and shipped to the facility for immediate installation. COST also offers the largest library of molded natural elements and other artifacts.

CONSTRUCTION

Theme construction requires experienced personnel to complete projects on time and within budget. Our artisans, skilled in creating exciting environments, bring to life the ideas developed through design and modeling. We promote a safe work environment and employ a full-time safety engineer to ensure compliance with COST's OSHA Safety Program and to monitor our HAZCOM and environmental guidelines. As an industry-leading theme construction firm, our experience ensures clients a smooth transition from consultation to completion.
